The Board of Directors shall constitute itself, unless otherwise provided by law. Resolutions can also be passed in writing by way of circular letter, provided no members request a verbal discussion of the item in question. These are to be included in the minutes.

There are usually six Board meetings a year, each lasting about five hours. Members of the Executive Board will be called in to these meetings if and when necessary. In the financial year 2019, eight meetings of the Board of Directors took place, with an average duration of five hours (two of which were held as a telephone conference). All members of the Board of Directors attended all meetings.

The tasks and responsibilities of the Compensation Committee are presented in the Compensation Report (page 82). The Board of Directors has not established any other committees. At our mid-sized company, the respective tasks are performed by the Board of Directors as a whole. Moreover, the Executive Board regularly consults with the Chairman of the Board of Directors and individual members on an informal basis regarding important aspects of specific topics.

Definition of Areas of Responsibility

The Board of Directors has the overall responsibility for the management of the company as well as the supervision of the executive management. The Board of Directors has delegated most of the executive management powers to the CEO. However, the Board of Directors remains responsible for tasks that legally cannot be delegated and other important business. These include in particular matters such as business strategy, approval of the annual budget, decisions with regard to acquisitions and important personnel matters.

Information and Control Instruments Vis-à-Vis the Executive Board

Executive management control is exercised primarily through regular reporting by the Executive Board to the Board of Directors, in particular by means of:

- monthly and quarterly financial reports including commentary on the corresponding key figures (incoming orders, sales revenues, margins, profits, investments, liquidity, capital commitment);
- regular information about market and business developments as well as important projects;
- detailed information about market and business developments at every Board meeting, which are partially attended by the CEO and CFO and by other members of the Executive Board as required.

In addition, the Chairman of the Board of Directors discusses current developments with the CEO on a regular basis. Walter Fust and Adrian Stürm also exercise further control functions as members of the Supervisory Board of Starrag Technology GmbH and Walter Fust as a member of the Board of Directors of Starrag Vuadens SA.

Risk Management

As a leading global manufacturer of precision machine tools, the Starrag Group is faced with various risks.

The most significant risks include:

- the weakening of the economic environment in customer markets as well as business cycles could lead to a reduction in demand,
- misjudgements of developments in customer markets or in the competitive environment could lead to missed business opportunities or losses,
- failure in research and development as well as other innovation-based activities could prevent business potential from being realised,
- a lack of availability of financial resources could impair the performance and operations of the Starrag Group and
- natural events (such as fires) could impair operating activities.

the Board of Directors and the Executive Board give high priority to the careful handling of strategic, financial and operational risks. The Starrag Group has a holistic risk management process which is analysed every year by the Executive Board and the Board of Directors.

The following goals are pursued:

- systematically identifying special risks,
- establishing processes to monitor, reduce and ideally to prevent risks and
- finding the right balance between risks and opportunities.

The risk management system is based on a classic risk matrix involving the probability of occurrence and possible extent of damage (identification and classification) and includes internal instructions as well as a risk log, in which operational data as well as action planning for risk management are documented.

The Executive Board has appointed an officer to implement and moderate risk management, who reports directly to the CFO, as well as a responsible member of the Executive Board for each risk area.

In the annual risk review, the risks are carefully identified, analysed and evaluated, and appropriate measures are defined to reduce the risks. This information is documented in a comprehensive group-wide risk matrix. The implementation of the measures is monitored by the risk management officer. In business processes with recurring risks, the resolved measures are integrated as process steps in the operative processes of the daily business.

On an annual basis, the Executive Board reports on the nature, extent and assessment of significant risks and the measures taken for risk minimisation to the Board of Directors. Risks in the area of accounting and financial reporting are monitored and reduced by a suitable internal control system.

Additional information on financial risk management can be found on page 103.

Internal Auditing

In accordance with the simplifications stated in the Swiss Code of Best Practice for Corporate Governance, the Board of Directors has decided not to implement an internal audit.

The codex implies corresponding simplifications for small and medium companies as well as for companies with active majority shareholders.
